

ORNA
Crafted for
attention

Honeywell

You don't have to be loud to stand out. Unique does not shout in your face. True magic lies in subtlety. In winning admiration out of fleeting glances. In making a statement without a single word. Premium craves no attention. It simply waits for the artful eye to find it and treasure it. And there lies its raison d'être.

ORNA
Crafted for
attention

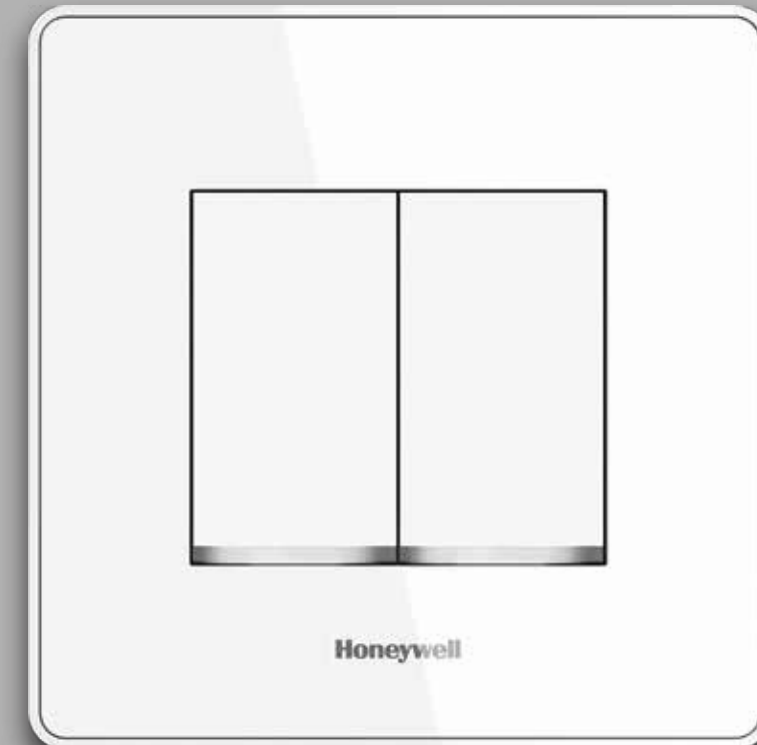

Premium flat switches for the artist in you.
For those who dare to go beyond the ordinary.
For those who crave uniqueness above all things else.

Nothing screams bold better than **Black**. When the world points fingers at you, Black **does not discriminate, it does not judge** – it is the strength that keeps you pushing against all odds. **Black is the rebel** that no one can hold back. It is here to stay and make its own way.

The immaculate and pristine **White** opens up a world of imagination. A new beginning, a peaceful aura, a masterpiece in the making – **White can be whatever you want it to be.** Let White be the breath of fresh air that greets you as you reinvent yourself.

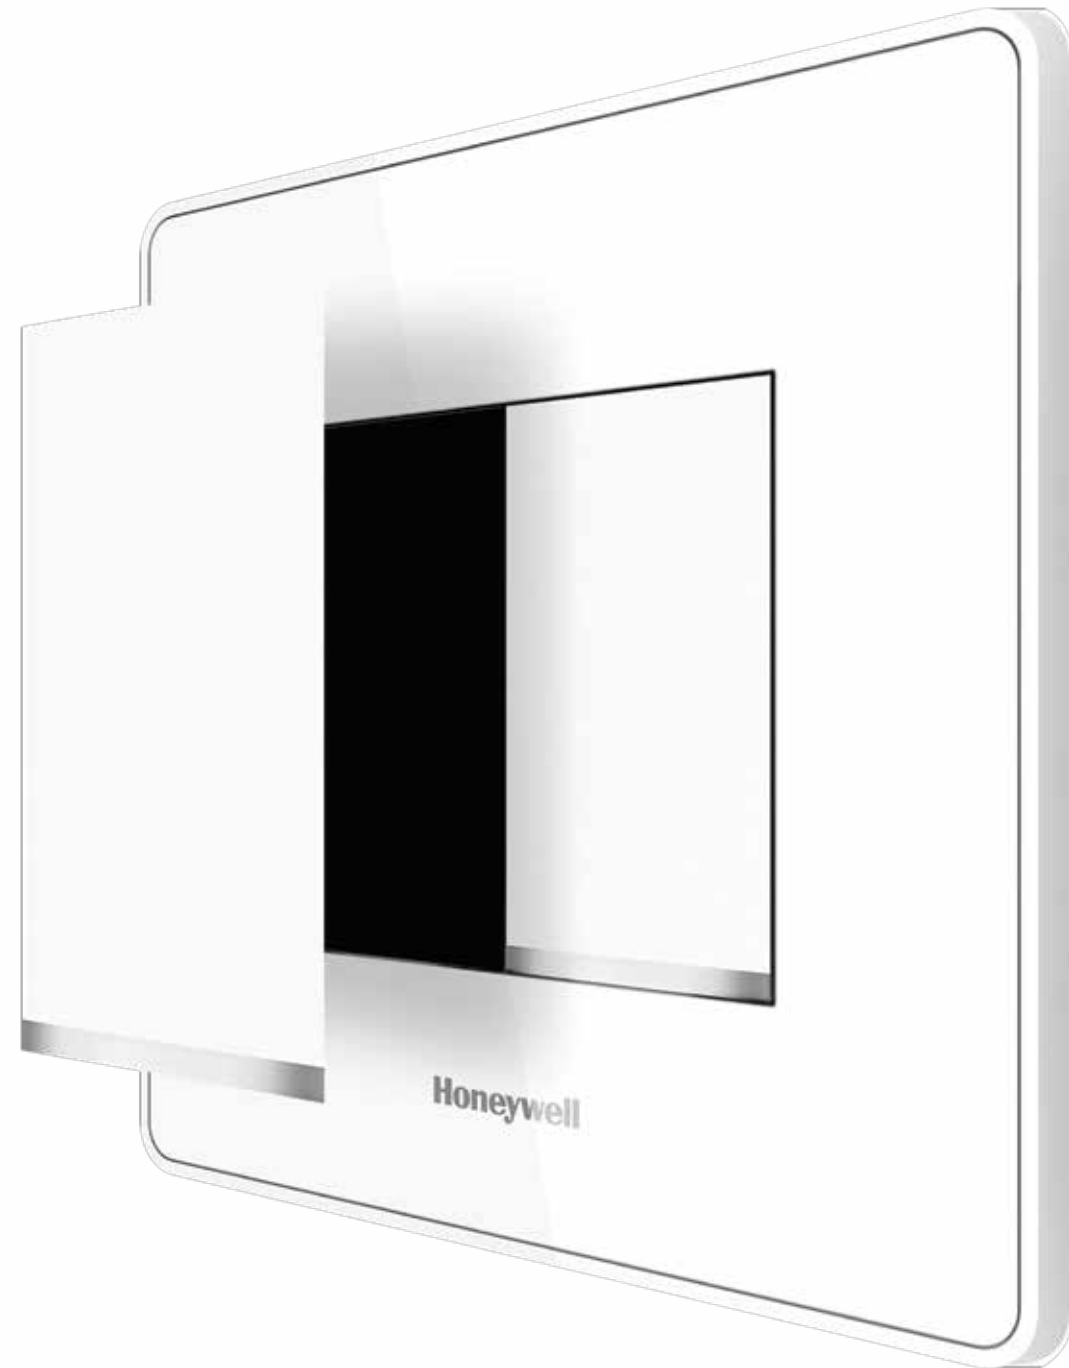

Orna is a range of switches **that boasts of premium modular wiring devices.** The flat electromechanical modular switches are **custom-made to pair up seamlessly** with the interiors of your home.

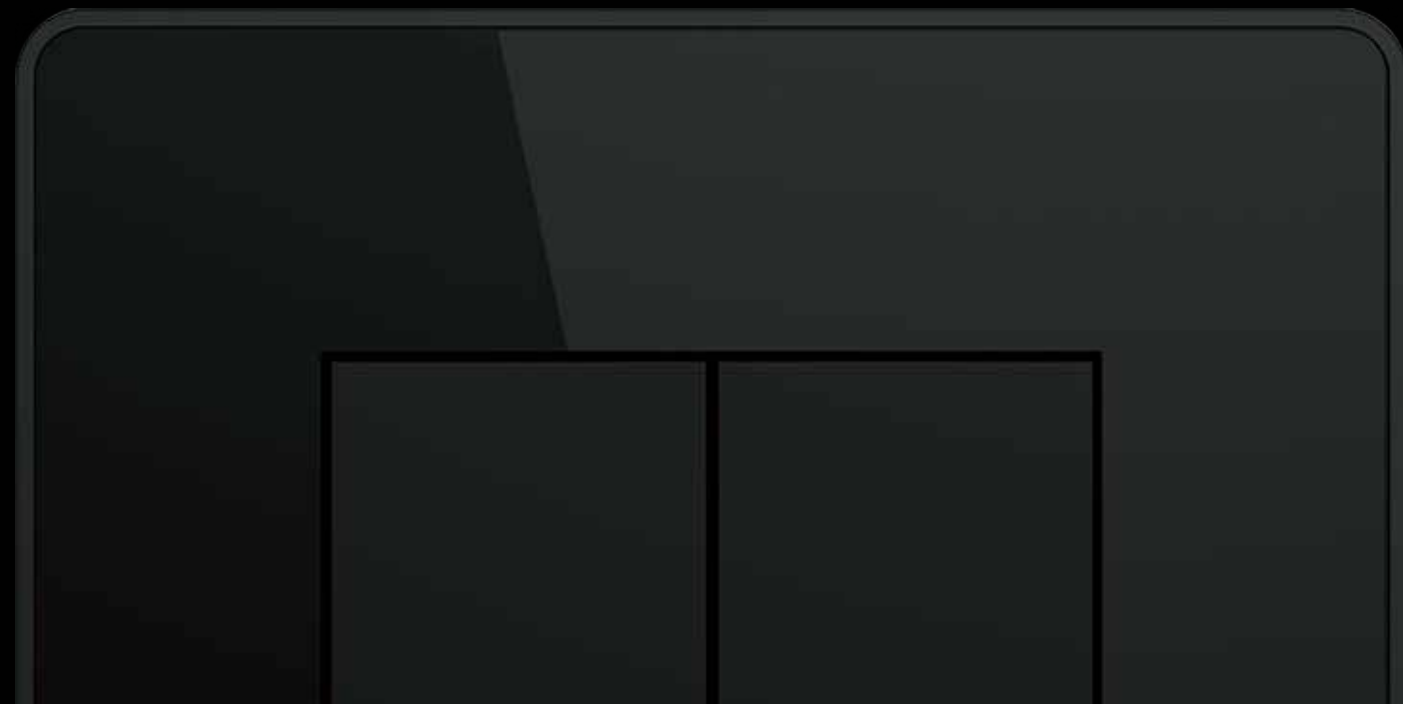

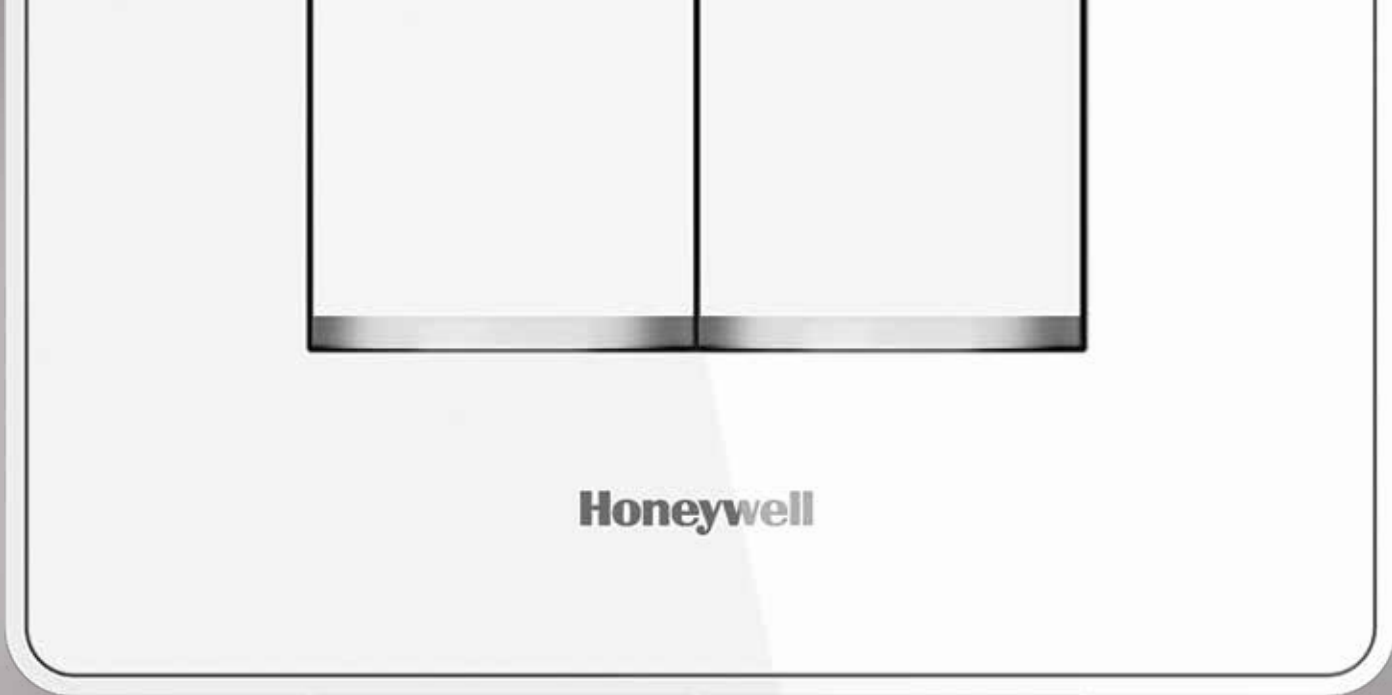

The thought of upgrading switches to be **stylised yet minimal** culminated into the formation of Orna. This range, thus, comes with the **patented 'Push To On, Push To Off'** mechanism to ensure smooth operation of the switches.

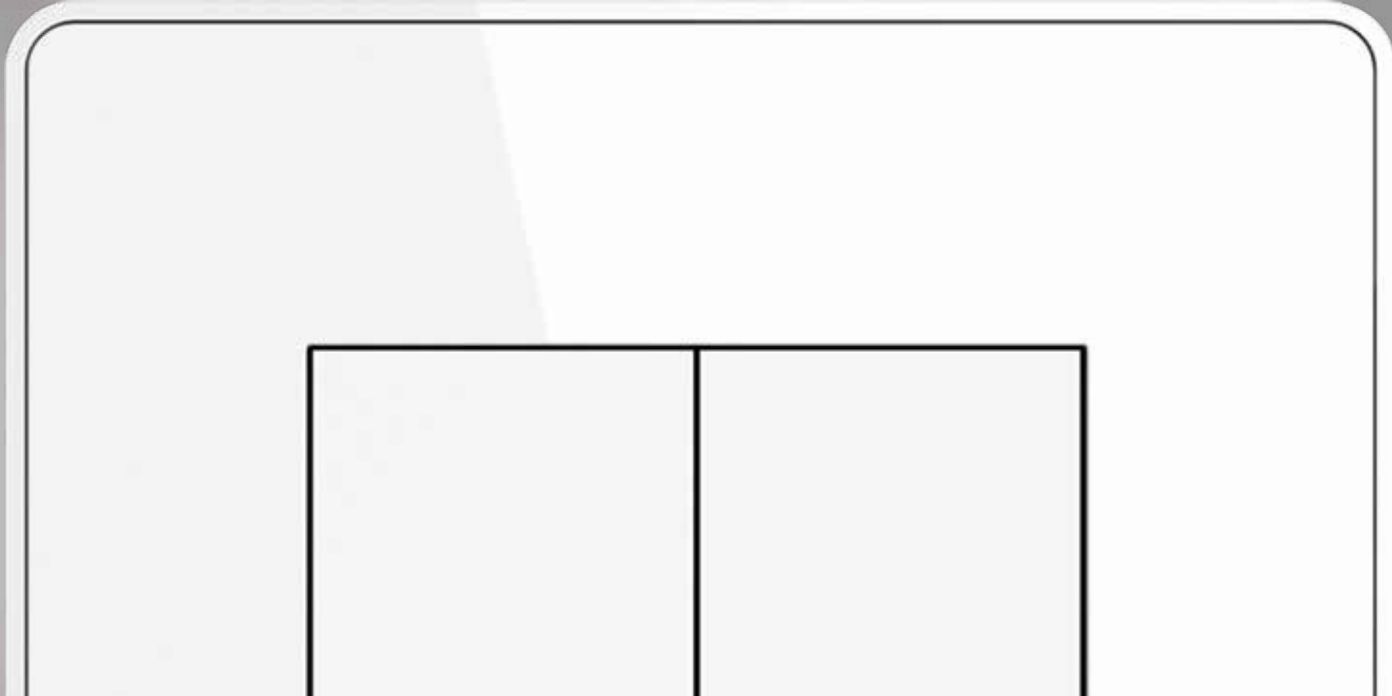

Orna is the perfect blend of aesthetically aware and energy conscious switches. They come with a patented pristine white LED Indicator Streak to demonstrate the status of the switch – powered on or off.

To glam up your walls and furnish them with an unforgettable demeanour, Orna switches come with mirror-finish front plates. Scratch-resistant glass plates have been used specifically to uphold the finesse for the long term.

Orna has been designed to be smart-ready. The glass-plate can be easily integrated with the Nucleus Smart Wiring Devices Range. This compatibility provides Orna with add-on smart features of device, scene and energy management.

ABOUT NUCLEUS

Nucleus is the core of everything, be it ours or the universe. It is the most important element that helps transform our eco system. In human beings, it contains genetic material that is responsible for controlling and directing trillions of cells that our body is made of.

Similar in nature if not the scale, is how complicated our homes can be, especially with our given busy schedules. Now imagine, would it not be ideal to have something that's at the core of your home. Something that helps transform your home the way you want. Something that lets your home be a reflection of your DNA. And something that's responsible for controlling everything that goes inside your home.

That's Honeywell Nucleus. A range of smart switches. Experience Smart Living.

Switches | Synthetic Chalk White
